Type: Spanish Track

Track: HIV

Topic: HIV–TB programme linkages

Description: Contact investigation in TB and HIV patients, strategies to improve collaboration between TB and HIV programmes are critical to serve all affected patients in an optimal way. Timely treatment of TB among HIV infected individuals needs to be promoted actively.

Target audience: Health care personnel treating TB and HIV patients at all levels of the health care system, civil society, funding agencies and health policy makers

Objectives:
1. To update about treatment policies of TB among HIV positive individuals
2. To highlight the importance of a good collaboration between TB and HIV programmes

Keywords: TB and HIV, treatment policies, treatment outcomes

Coordinator(s): Antonio Moreno (Spain)
