UITB 08. TB en poblaciones vulnerables

Wednesday, 29 October 2014, 14:45 - 16:30

Type: Spanish Track
Track: Tuberculosis
Topic: TB in special populations and institutions

Description: TB affects above all vulnerable populations, in low and in high income countries. This symposium will give an overview in several large cities and give an opportunity to compare the situation of vulnerable populations and the ways in which TB is managed.

Target audience: Health care personnel, civil society, policy makers, government officials, NGOs

Objectives:
1. to emphasize the role of nurses and other health care personnel in caring for vulnerable populations
2. to show the risks of neglecting vulnerable populations affected by TB
3. to discuss the effects of the economic crisis on TB programmes in large cities

Keywords: TB; vulnerable populations; poverty; TB strategy.

Coordinator(s): Arancha Romero (Spain)

Chair(s):
